

COPPER LINES ARE FADING

Your Connection Doesn't Have To

Keep your business connected with TitanNGN's modern, reliable phone solutions that work the same way, only better.

THE CHALLENGE

Phone carriers are retiring the copper lines that have powered business communications for decades. As those lines age out, costs are rising, maintenance is declining, and reliability is at risk.

Waiting until a failure happens can lead to lost connectivity and costly downtime.

THE TITANNNGN SOLUTION

e-POTS

For everyday analog connections

- ⇒ Works with your existing phones, fax, and paging systems
- ⇒ Quick installation — no system overhaul required
- ⇒ Save up to 15% on monthly phone costs
- ⇒ Nationwide availability and 24x7 monitoring
- ⇒ Keep your numbers, devices, and routines

e-PRI

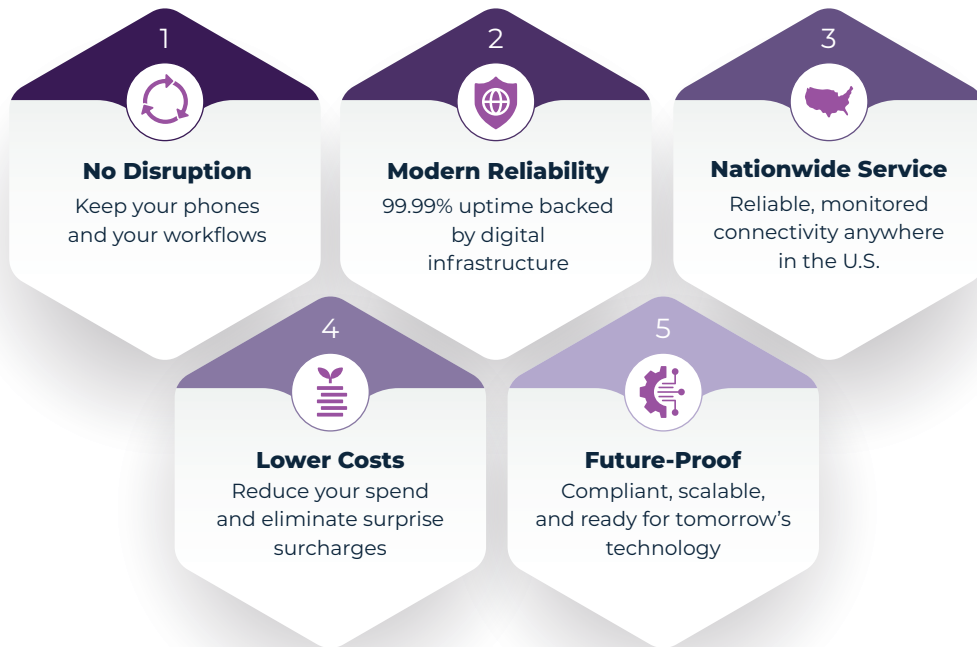

For high-volume and PBX-based systems

- ⇒ Keep your existing PBX — no new hardware required
- ⇒ Enterprise-grade reliability with geo-redundant data centers
- ⇒ Device included and fully managed by experts
- ⇒ Designed for seamless integration and scalability

COPPER LINE REPLACEMENT

WHY BUSINESSES CHOOSE TITANNGN

FUTURE-PROOF YOUR PHONE SYSTEM BEFORE COPPER DISAPPEARS
